

Agh-A Pocket Folder Warning !?!

Hi, Jubilee's President Allen McNeill, here. You may be surprised to see a WARNING when all you really want is 100 or 200 quick and easy pocket folders.

However, there are some reasons why your job may not print the way you want. When I Googled "digital print problems" it returned 68,000,000 results. So, please read this.

1. Digital printing is done using four color process (cyan, magenta, yellow & black) not specific PMS color inks.
2. Roughly 1/3 of all PMS colors cannot be matched from four color process printing.
3. If you(r) customer is picky about their PMS color process printing may not be a good choice-just being honest here.
4. Difficult colors are generally those in the middle of each "page" (see below) of the PMS color matching book. No printer, using any press or any type of printing such as laser, litho, ink jet, flexo or otherwise, anywhere in the world can print Reflex blue or Orange 021 from four color process. It's physically impossible. That goes for lots of other colors, too.
5. Some large area solid colors can be cloudy or streaky.

Having said all that, **Jubilee offers** low quantities and pricing so you can make **great margins!** And we print tens of thousands of beautiful pocket folders every year. Our heavy paperboard and high gloss finish are beautiful. I just want to make sure we are right for you.

If you(r) want to make sure we are a good match we will produce a real printed sample for you. The nominal cost is \$15.00 plus shipping and requires a PO or CC payment.
